<b>POLICIES</b>	
<b>Attendance policy</b>	The student must attend 100% of practical classes. In case of skipping classes, the student must work missed class according to the schedule of reworks, approved by the department in the presence of the relevant order of the dean's office.

<p><b>Assessment policy</b></p>	<p>When mastering the materials of the discipline, the student is awarded a maximum of 5 points for each practical session (the grade is given in the traditional 4-point grading system) for testing and oral answers. The test control is considered passed if the student answered 60% of the questions correctly (6 correct answers out of 10 questions). At the end of the academic year, the student's arithmetic average is calculated. The maximum number of points that a student can get in practical classes during the academic year is 200. The minimum number of points that a student must score for the current educational activity to enroll in a discipline is 120 points. The number of student points is calculated using the formula 200 multiplied by the arithmetic mean and divided by 5. Incentive points are added to the grade in the discipline for the implementation of an individual research project (defense of a student thesis 12 points, presentation at a conference 5 points, poster presentation at a conference 4 points, theses reports 3 points). The total score for the discipline cannot exceed 200 points.</p>
<p><b>Deadlines and course retake policy</b></p>	<p>In case of an unsatisfactory result in the discipline, the student has the right to retake the assessment twice to the teacher who taught the discipline. Rewriting the assessment is conducted in the form of testing (50 questions, of which 60% of the questions must be answered correctly and an oral answer to 2 theoretical questions covering the entire material of the discipline). The student has the right to receive an explanation of the received grade.</p>
<p><b>Assessment appeals policy</b></p>	<p>The results of the module and semester assessment are subject to appeal. A student must lodge an appeal to the director/dean on the day of certification or after announcing the results, but no later than the next working day. The appeal commission is established by the director/dean's order. The appeal commission's decision may change the grade in case of violations revealed during the attestation.</p>
<p><b>Academic integrity policy</b></p>	<p>Participants must complete all tasks according to the course requirements independently. Participants are not allowed to cheat during the written module or summative test. The assignments should not contain plagiarism, facts of fabrication, falsification, cheating. Manifestations of other types of academic dishonesty determined by the Academic Integrity policy are also unacceptable. If a teacher reveals violations of academic integrity by students during the course, the former have the right to take one of the following actions: - to reduce points by up to 40% for practical assignments; - to give recommendations for improving and resubmitting mandatory homework assignments with the reduction of points by up to 25%; - to not accept mandatory homework assignments without the right to resubmit; - set a date for retaking the written module or the summative test with a reduction of points by up to 15%; - to not allow to retake the written module or the summative test.</p>
